## SFIC Stocked Melt and Pour Soap Bases (December 2017)

**Clear & White Glycerine Melt and Pour Soap Base:** (our well-loved "As Natural As We Can Make It" formula 20% added Glycerine, mainly Coconut oil) This is the soap base that started it all! Our soap is traditionally made with fine natural vegetable oils and alkali. Opaque has titanium dioxide for whitener.

**Goat's Milk Melt and Pour Soap Base:** (10% Goat's Milk) Goat's Milk is thought to soften skin. Our Goat's Milk soap is made with real liquid goat's milk and has a delicate creamy lather with a "custard" color.

**Shea Butter Melt and Pour Soap Base:** (5% added refined Shea butter) Many believe that Shea Butter moisturizes and softens skin. Our Shea base is white soap base formula with added Shea, provides creamy lather, and is one of our most popular soap bases.

**Olive Oil Melt and Pour Soap Base:** (20% kosher grade A extra virgin olive oil) Olive oil is believed by many to create a soap that moisturizes the skin and has great lather. Due to the high content of olive oil a light attractive pale yellow color may be noticeable which will darken slightly in time.

**Castile Melt and Pour Soap Base:** (25-30% kosher grade A extra virgin olive oil) Castile soap is the old time soap made for hundreds of years.

**Oatmeal Melt and Pour Soap Base:** Oatmeal is said to exfoliate our skin. Our oatmeal soap is made with our white soap base and has great lather along with a "crunchy" oat look in a Melt and Pour Soap bar.

**Aloe Vera Melt and Pour Soap Base:** (5% added Aloe Vera Gel) Aloe Vera has been used for burns, abrasions and healing for centuries. Aloe Vera gel is added to our clear soap base becoming greenish in color.

**Honey Melt and Pour Soap Base:** (made with 10% added 100% Pure Natural Grade A Honey) A generous amount of natural Honey has been added to our clear soap base to make a light to mid amber color. Our honey soap does vary in color depending on the raw honey that we use and heat when applied Melting and Pouring.

**Crystal Clear Melt and Pour Soap Base:** (25% added glycerine, with a surfactant made from coconut oil: Coco Amidopropyl Hydroxysultaine) The clearest soap base we have ever made! This formula is based on Extra Clear but we have made modifications to make it perfect for embeds. Note: This soap base may be more "sweaty" (glycerine drawing the moisture from the air) with this higher glycerine formula.

**Shaving Melt and Pour Soap Base:** This is a clear soap base made to lather with loads of luxurious foam, great for shaving or just for someone who loves great heavy lather.

**Low Sweat Clear and White Melt and Pour Soap Base:** Enjoy the look of cold process in a Melt and Pour soap base. These soap bases can be wrapped in paper and are low 'sweating'.

**Hemp Seed Oil Melt and Pour Soap Base:** (5% added unrefined hemp seed oil) Our olive oil soap base has hemp seed oil added. Hemp Seed Oil is professed by many to have special properties.

**Cocoa Butter Melt and Pour Soap Base:** (5% added unrefined cocoa butter) Our White M&P soap base with added cocoa butter, gives off creamy lather and also has a light smell of chocolate.

**FREE Clear Melt and Pour Soap Base:** Clear base without Propylene Glycol

**Organic Oil Clear (stocked) and White Melt and Pour Soap Base (custom):** Certified Organic Oils of Palm and Coconut have been used in our regular clear and white formulations. Please note these are made with organic oils but are not certified organic soap as a whole. (Custom Order Minimum 1000 lbs for Organic Oil White)

**Palm Free Melt and Pour Soap Base:** Clear or White melt and pour soap base without palm oil. This soap may contain a small amount of tallow based fatty material. (Custom Order Minimum 1000 lbs per kind of base)

**Extra Hard White Melt and Pour Soap Base:** This is a harder formula made for long lasting soap lovers. It can be mixed with other bases to harden the finished bar.
